***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/6/2005 has been entered.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-10, 12-31, 33, 35-43 and 123-126 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese patents 77 06,258, 76 42,057, 74 34,929 and 74 14,621. Japanese patents 77 06,258, 76 42,057, 74 34,929 and 74 14,621, as described in pages 9 and 10 of the specification submitted by the applicant on 3/7/2002 for example, teaches compositions for seals which meet the requirements of the instant claims, including both a trivalent cobalt compound and a valence stabilizer compound.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1742

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 44-53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese patents 77 06,258, 76 42,057, 74 34,929 and 74 14,621 in view of Ouyang et al. As applied to claim 1 above, Japanese patents 77 06,258, 76 42,057, 74 34,929 and 74 14,621 show all aspects of the above claims except to expressly teach the instantly claimed coloring or coloring additives for the coatings. Ouyang et al teaches that it was known in the art at the time the invention was made to employ colorings and coloring additives in coatings of the type taught by Japanese patents 77 06,258, 76 42,057, 74 34,929 and 74 14,621 in order to provide the coatings with desirable color properties. Motivation to include the colorings and coloring additives of Ouyang et al in the compositions taught by Japanese patents 77 06,258, 76 42,057, 74 34,929 and 74 14,621 would have been a modification obvious to one of ordinary skill in the art at the time the invention was made because Japanese patents 77 06,258, 76 42,057, 74 34,929 and 74 14,621 would also desire the improved coloring properties provided by the coloring and coloring additives taught by Ouyang et al.

#### ***Allowable Subject Matter***

Claims 11, 32 and 34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

Applicant's arguments filed on 10/6/2005 have been fully considered but they are not persuasive. Applicant's arguments that since all mention of the admitted prior art of the instant disclosure (Japanese patents 77 06,258, 76 42,057, 74 34,929 and 74 14,621) in the specification have been removed, that the Japanese patents 77 06,258, 76 42,057, 74 34,929 and 74 14,621 cannot be relied upon to anticipate the instant claims is not persuasive because applicant's description of these references in the manner relied upon by the examiner are of record in the instant application.
